Brainstorm & Idea Prioritization

DATE	TEAM ID	PROJECT NAME	MAXIMUM MARKS
29/09/2026	SWTID-2026-8965	Auto Ticket Classification using Flow Designer	4 Marks

PROBLEM STATEMENT / HOW MIGHT WE?

How might we automatically classify school IT support tickets based on their issue description and reduce the manual effort required by the IT helpdesk?

Brainstorming Ideas

Classification

1. Automatically classify tickets using keywords.
2. Automatically assign the correct ***Category***.
3. Automatically assign the correct ***Subcategory***.
4. Detect Wi-Fi/network-related issues.
5. Detect projector-related issues.
6. Detect password/login-related issues.
7. Detect slow computer-related issues.

Automation

8. Use ***Flow Designer*** to automate ticket classification.
9. Automatically send an email confirmation to the caller.
10. Automatically route tickets to the appropriate support group.
11. Trigger classification automatically when a ticket is created.

Improvement & Scalability

12. Add more keywords for different IT issues.
13. Make classification rules easy to modify.
14. Extend the flow to support additional ticket categories.
15. Maintain standardized ticket information.

Idea Grouping

Classification

- Keyword-based ticket classification
- Automatic Category assignment
- Automatic Subcategory assignment
- Issue detection

Automation

- Flow Designer automation
- Automatic classification when ticket is created
- Automatic email confirmation
- Automatic ticket routing

Improvement & Scalability

- Add more keywords
- Modify classification rules easily
- Support additional categories
- Standardize ticket information

Idea Prioritization

High Importance – High Feasibility

- **Keyword-based ticket classification**
- **Automatic Category and Subcategory assignment**
- **Flow Designer automation**
- **Automatic classification when a ticket is created**
- **Automated email confirmation**

High Importance – Low Feasibility

- AI/ML-based ticket classification
- Advanced predictive ticket routing

Low Importance – High Feasibility

- Adding additional keywords
- Classification result tracking

Low Importance – Low Feasibility

- Additional ticket categories
- Advanced analytics and prediction features
- Complex AI-based support automation

SELECTED IDEA

To Develop a no-code Flow Designer solution that automatically classifies newly created school IT tickets by analyzing keywords in the Short Description and assigning the appropriate Category and Subcategory, followed by an automated email confirmation.
