Customer Problem Statement

Auto Ticket Classification using Flow Designer

The IT helpdesk receives multiple support tickets from users. The tickets can be related to different issues such as Wi-Fi, projector, password, or slow computer problems. The current process requires manual review and classification of each ticket, which is time-consuming and error-prone.

I am	I'm trying to	But	Because	Which makes me feel
An IT helpdesk staff member.	Classify incoming IT tickets correctly and quickly.	I have to manually review and categorize each ticket.	Tickets can involve different issues such as Wi-Fi, projector, password, and slow computer problems.	Stressed and concerned about delays or incorrect classification.

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	IT helpdesk staff member.	Classify tickets correctly and quickly.	Manual categorization takes time and requires effort.	Tickets involve different types of IT issues (e.g., Wi-Fi, projector, password, slow computer).	Stressed about delays or incorrect classification.
PS-2	IT helpdesk staff member.	Process support requests efficiently.	Each ticket must be reviewed individually.	A large number of tickets can require repetitive classification.	Overloaded and frustrated.
