PROJECT DESIGN PHASE-II

Solution Requirements

(Functional & Non-functional)

DATE	TEAM ID	PROJECT NAME	MAXIMUM MARKS
29/09/2026	SWTID-2026-8965	Auto Ticket Classification using Flow Designer	4 Marks

Functional Requirements

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	**Ticket Creation**	• Create an IT ticket with Caller and Short Description • Enter ticket Description • Automatically generate Ticket Number
FR-2	**Automatic Ticket Classification**	• Analyze keywords in the Short Description • Automatically classify the ticket based on the identified issue • Classify Wi-Fi, Projector, Password, and Slow Computer issues
FR-3	**Category & Subcategory Assignment**	• Automatically assign the appropriate Category • Automatically assign the appropriate Subcategory • Maintain dependent Category and Subcategory values
FR-4	**Email Notification**	• Send automated email confirmation to the Caller • Include ticket/request confirmation in the email
FR-5	**Ticket Information Management**	• Store ticket information in a structured format • Maintain State, Assigned Group, and Assigned To details
FR-6	**Flow Maintenance & Scalability**	• Allow classification rules and keywords to be modified • Support addition of new categories and classification rules

Non-Functional Requirements

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The solution should be simple and easy for IT helpdesk staff to use, with minimal manual intervention.
NFR-2	**Security**	Ticket and user information should be handled securely within the ServiceNow platform, with access controlled according to user roles.
NFR-3	**Reliability**	The Flow Designer automation should consistently classify tickets according to the predefined keywords and rules.
NFR-4	**Performance**	Ticket classification should occur automatically after ticket creation without unnecessary processing delay.
NFR-5	**Availability**	The ticket classification flow should be available whenever the ServiceNow helpdesk application is being used.
NFR-6	**Scalability**	The solution should support adding new keywords, categories, subcategories, and classification rules as the number and types of tickets increase.
