## Problem – Solution Fit

Validate that the problem you're solving is real for your users and that your solution actually meets their needs.

**Define the Customer**

### 1. CUSTOMER SEGMENT(S) — CS

- IT Helpdesk Staff (primary user)
- Ticket Requesters (students / faculty / staff)
- IT Helpdesk Administrator (maintains the flow)

**Key Characteristics**

- Uses ServiceNow for daily operations
- Needs quick and accurate ticket classification
- Prefers minimal manual effort and simple workflows

### 2. CUSTOMER CONSTRAINTS — CC

- Manual classification is time-consuming and error-prone.
- Need to handle different issue types (Wi-Fi, projector, password, slow computer, etc.).
- Limited technical knowledge for creating complex flows.
- Requires easy maintenance and future scalability.

### 3. AVAILABLE SOLUTIONS — AS

- Use ServiceNow Flow Designer for no-code automation.
- Analyze keywords in Short Description.
- Automatically assign Category and Subcategory.
- Send email confirmation to the requester.
- Maintain and update classification rules easily.

**Explain the Solution**

**Focus on the Problem**

### 4. JOBS-TO-BE-DONE / PROBLEMS — JBP

What are the real jobs or problems the users face?

- Quickly classify IT support tickets without manual effort.
- Avoid misclassification and human error.
- Get automated confirmation after submitting a ticket.
- Manage and track tickets efficiently.

### 5. PROBLEM ROOT CAUSE — RC

Why does the problem exist?

- Lack of automation in ticket classification.
- Manual review of each ticket is time-consuming.
- Inconsistent categorization and subcategorization.
- No immediate confirmation to the requester.

### 7. BREAKTHROUGH — BR

What is the key insight that makes the solution work?

- Using Flow Designer, we can automate classification based on keywords.
- Predefined rules ensure correct Category and Subcategory.
- Email notification improves communication and satisfaction.
- No-code approach makes it easy to maintain and scale.

**Explain the Job / Solution**

**Reinforce the Fit**

### 3. TRIGGERS — TR

What triggers the user to take action or use the solution?

- When a new ticket is created in ServiceNow.
- Need for faster resolution and reduced manual work.
- Increase in support requests or recurring issues.

### 4. EMOTIONS: BEFORE / AFTER — EM

How do users feel before and after using the solution?

**Before:** Overwhelmed, frustrated, anxious about errors, and time-consuming manual work.

**After:** Confident, relieved, and satisfied with automated classification and quick confirmation.

### 5. YOUR SOLUTION — SL

How does your solution solve the problem and create value?

- Automatically classifies tickets using Flow Designer.
- Assigns correct Category and Subcategory.
- Reduces manual effort and human error.
- Sends email confirmation to the requester.
- Easy to maintain and extend with new rules.

### 6. CHANNELS OF BEHAVIOUR — CH

Where do users go to find and use your solution?

- ServiceNow Web UI / Service Portal
- Email notifications
- IT helpdesk team communication
- Internal training / documentation

### 5. ACTUAL — AC

How do users actually use your solution?

- Create tickets through ServiceNow portal
- Receive email confirmation
- View and track ticket status
- Interact with IT helpdesk for further support

**Extend Reach & Drive Adoption**
